

CARE Construction Safety Program Overdose Resource Group

Naloxone Request Form

Please complete the top half of this form to request free Naloxone doses and/or overdose response kits from the AGC MA CARE Construction Safety Program. Best practice is to have at least 2 doses per location which expires every 2 years.

Naloxone/Narcan is approved for over-the-counter distribution and individuals who respond to an emergency situation are protected by Good Samaritan Laws. The MA Dept. of Public Health asks that individuals seek training and that recipients report back usage for rescues if possible.
